

## Trees added by LHH

Tree no. on plan 1405/1	Name <i>Latin name</i>	Approx. Height in metres	Canopy spread in metres.	Diameter of girth in cms.	Age of tree Y = young M=mature A=aged	Risk Assessm ent*	Amenity Value	Comments
<a href="#">Tree no. on 1995 plan</a>					Y = young M=mature A=aged		LHH	<a href="#">Comments by LHH</a>
<a href="#">Tree no. on 1995 plan</a>					Life expectancy In years	<a href="#">See Arborsite report</a>	<a href="#">Class condition</a>	<a href="#">Comments in 1995 report</a> <a href="#">Comments in D Brown report 1998 report</a> <a href="#">Comments in Arborsite report 2010</a>
<a href="#">109</a> <a href="#">105</a>	<b>Fig</b> <i>Ficus carica</i>	3			A		Attractive feature but possibly limited life	<a href="#">Check regularly</a>
<a href="#">110</a>	<b>Privet</b> <i>Ligustrum ovalifolium</i>	5	5	shrub	A		Old shrub but makes attractive grouping with Hawthornns	<a href="#">Clear Euonymus beneath and monitor condition</a>
<a href="#">111</a> <a href="#">166</a>	<b>Weeping Pear</b> <i>Pyrus salicifolia</i> 'Pendula'	4	3	10	M		Attractive small tree	<a href="#">Weeping pears benefit from regular pruning</a>
<a href="#">112</a>	<b>Yew</b> <i>Taxus baccata</i>	4	3				<a href="#">Scruffy tree but screens shed and part of screen to road</a>	<a href="#">Could be improved by 'rejuvenation' pruning</a>

113 153	Lime <i>Tilia x europaea</i> .	10-15	6	30	M	15-25	medium	Boundary tree on corner, not very good specimen Class 3 fair	Not very good specimen
5									Low vigour Co-dominant stems, abnormal lean, dead wood in canopy suggest 30% reduction
114	Flowering Cherry <i>Prunus</i> spp.	3-5	2	10	Y			Young tree, but rather close to Davidia	Could be lifted and replanted where room to grow.
115 8 28	Ash <i>Fraxinus excelsior</i>	20-30	10-15	80	M	>50	medium	Tall tree, important visually Class 2 fair	Reduce to 5m spread radius Dead wood in canopy, suggest aerial inspection and dead wood removal
116	Wych Elm <i>Ulmus glabra</i>	5-10			Y			Part of large group of trees and shrubs, hard to assess	Dense canopy, low branches.
117 129	Holly <i>Ilex aquifolium</i>	M			M				
118	Medlar <i>Mespilus germanica</i>				Y			Very attractive small tree at front of tree group	Medlars tend to need support for most of their lives or they fall over, check regularly
119									Tree yet to be identified or measured

120	<b>Weeping Pear</b> <i>Pyrus salicifolia</i> 'Pendula'	M					M		Attractive small tree	Weeping pears benefit from regular pruning
121	<b>Maple</b> <i>Acer</i> spp.	S					Y		Very attractive maple one of several in the garden	Maples do well and more should be planted
122		S					Y		Newly planted tree	To be identified
